About This Game

Your favorite YouTuber and Streamer **PsiSyn** is back again with another adventure called the PsiSyn: The Game, where all your favourite memes and moments from PsiSyn come to life in the form of a video game!

PsiSyn: The Game is a first person shooter that uses unique movement and weapons on various maps and gamemodes.

UNIQUE MOVEMENT

Learn the movement to gain advantages over other player's. The movement is very advanced with features such as strafing and bopping for that true FPS feel.

VARIETY OF GAMEMODES

Play gamemodes like Deathmatch and Gun Game. Future gamemodes will include Search and destroy and infected!

UNIQUE LOCATIONS

Play in stunning locations around the world! For example you could play in the radiated exclusion zone of Chernobyl, or in the empty scorching desert of Iraq.

RANGE OF WEAPONS

Use real weapons or some questionable looking ones.

LOADOUT SYSTEM

Create the perfect loadout with an insane amount of options!

The screenshot displays a digital tabletop environment for a Dungeons & Dragons 5th Edition game. On the left, a 'Dungeon Map' window shows a grid of rooms from Room 1 to Room 7. A 'Wandering Monsters' window lists 'Black Pudding' as an encounter in Room 4. The main focus is on the 'Gray Ooze (Room 5)' character sheet, which provides detailed statistics and abilities for the creature.

(MD 008: Carrionholme)
 Daughters of the Morass. Fervent followers of The Faceless Lord, they have bound a number of alimes and oozes to their service, mainly to protect their home. From their sunken home near the centre of the swamp, which they have named Carrionholme, they attack and raid nearby communities of all races as they aren't fussy who they consume. The more barbaric races - local tribes of orcs, lizardmen and kobolds - hold these evil sisters in contempt, whilst the more civilized races that live in and around the swamp are terrified of them.

Room 4
 This small chamber is relatively featureless and presents one of the locations where a black pudding may be present.

Room 5
 This chamber contains two small cages (that may or may not contain victims, at the DM's discretion), but is otherwise featureless. It presents one of the locations where a black pudding may be present.

In it's current state, this game feels too much like additional content for BH1 to be justified as a separate game. Open mic is a great feature for those who primarily use a streaming service to listen to music.

Have fun mapping your controls. Unlike any other game that lets you look at a list of controls and change individual things, you have to map each button again when you want to change one control. You can't view the controls without changing them. Oh yeah, and the controls are obscure, simply listed as perk weapons 1-4 rather than ultra beam, super bomb, etc.

There's potential for good stuff, but I do regret buying this as a full game at this time. Currently there isn't enough new stuff to make this game feel fresh compared to BH1, which I played a lot of.. this episode is by far once of the most difficult to master. By the end all characters will have been recruited. There is a lot of jumping in this story part esp. through the Grand Rift. there still are hidden rooms but most of the game is getting to recruit the Bear. the story mainly focuses on that particular part. Dissent starts to show amongst the recruits and it takes a lot of talking and self- confidence to get the party going again. Game seems rather slow story -wise during this episode but is still a good game to play.

Refunding for the third year. Probably wont do this again. Finally added a suggested racing line, BUT it only shows in practice! Garbade physics. These games are just straight trash. Save your money. I love playing typing games but it's hard to get. This game reminds me of Typing Tutor (DOS). To be honest, I don't know whether I should recommend this game or not.

I kind of enjoyed playing this game. The design is simple but it's an enjoyable game. On the other hand, the game has a few setbacks. The minor thing which I wish the game has: a setting to mute the sound or music. Some players just want to listen to their own music to play a game.

Sometimes but not often, the words didn't really work. I have no idea why although I had repetitively typing the alphabet. And sometimes, the word requires capital letter. One example is the word - AM. I tried smallcase but it doesn't work and when I use capital letters, it works. When I played in a different round, the smallcase is acceptable. I wish there's an indicator when I should use capital letter or all words change to smallcase letters probably will be easier.

Although sometimes the words didn't really work, I still like the game but disappointed after I know how the achievements work. The list is just a bunch of meaningless alphabets or characters. It's not related how you play it. As long as you miss the word in the game in different difficulty level, you will get one achievement. Besides of the EASY level, I've played the game seriously for both MEDIUM and HARD level. I wish the achievement will be something like 50 words that you spelled contain 'A' or 100 words that you spelled begin with 'A'. Then, that list of achievements make more sense and will be more fun earning them.

If you are an achievement hunter or someone who likes typing or casual games, this is a recommendable game but if you are an achievement hunter with principle or someone who can't tolerate any bugs in a game, this is not a game for you.. This is much better than BF bad company 2 ,thx for this great music,maps and weapons only the choppers are more powerfull in hands of skilled players, sometimes ruins the game ..9,5V10

This game is cool. Kids will love it for sure xD I love it too. But it needs a button for skipping time. The time between appointments is a drag :(But once you get all sorts of animals in the pen, you get busier. So, don't worry :). Farming Simulator 2017 but the tractor is a Bangbus. If you aren't 100% certain you want this game, do not buy it. If your goal is to create roller coasters and the park aspect is secondary, go NoLimits. Despite the name, Planet Coaster is NOT about roller coasters. Sure, they are there, but they take a backseat to the creation and management of a park. If you aren't willing to spend hours upon hours working on scenery and building, you will not do well in the game. If that's your type of thing, great. Get this game. If you aren't willing to do this, expect the challenge mode (where you have limited money and have to start from the ground up) to be mercilessly difficult, even in the easy mode. The career modes will give you something to do but those can become boring over time. The sandbox will let you create whatever you want but you'll soon find that the roller coasters are the opposite of smooth thanks to some of the least caring developers I've seen. The controls are a disaster and will take you a while to learn. Working inside of terrain might just be the most painful experience I've ever had the displeasure of doing. You might see the workshop and see that as a benefit to the game. In reality, it just ends up being disappointing when you realize nearly everything requires DLC, which if you want everything will set you back an extra \$86 (adding up to \$131 dollars total, a number that will rise with future DLC).

If you are debating between this and NoLimits, please get NoLimits.. One of my all time favorites, I used a spreadsheet to calculate demand/supply and programmed an algorithm to optimize trade routes based on my calculated values.. Totally not solving mysteries: The game

I think my mom would like this given how it's like her mobile games (HA) and all.

Real review wise:

This is not a point and click mystery. THIS IS NOT A POINT AND CLICK MYSTERY.

You will spend most of the game looking at static images and finding items from a list at the bottom and clicking on them. The plot will only advance once you've clicked on all the♥♥♥♥♥♥on the screen that's listed (Some of which is very creatively placed, props to them on this).

But really, this is not a point and click mystery.
